

15' Dauntless launch CHEEKY for sale

Cheeky was originally built as a 15' inboard launch and fitted with a Stuart Turner inboard engine. This has since been removed and the stern-post capped off. The complete set of this stern gear will be sold with the boat.

For several years she was owned by the Ramsgate Harbour Authority and used as the Harbourmasters launch. For this purpose she has an additional sheer-strake added, the ribs doubled and a stronger gunwale fitted as the exposure to Westerly winds can make the harbour rough.

A cuddy was added at a later date and so she is a very sturdy and dry boat when offshore and makes a safe and stable platform for rod angling.

Although she has no leaks at all, she is fitted with an automatic bilge, and manual bilge pump.

An excellent 10hp Mariner electric start outboard is included and gives her 6 knots. She is lying afloat in the current owner's garden on the river Glen and there is a slipway within 50 yards. The owner will deliver her at cost if a suitable trailer can be provided. She is currently located at Spalding Lincs.

Overall condition of paintwork is good and the outboard recently serviced.

Price £950
