

## Classic Wooden Motor Launch – PROJECT

I have a **Dauntless Boat Building Co** wooden Motor launch, circa 1954.

I obtained her with the idea of a refurbish project. She is believed to be an ex Harbour Masters launch from the Ramsgate area and possibly had a small cuddy forward with a 8 to 10 HP Stewart Turner engine.

I believe she is mahogany on oak frame and is in need of some fairly substantial refurbishment work. She does not have a trailer or engine but there is a prop shaft and stern tube ready to be refitted.

Regrettably a recent illness has curtailed my ambitions and the taking on of such a project is no longer feasible for me. She is housed in a dry car port, covered (very dry & ready to refit) but would need a trailer and lift to move her. I am located between Southampton and Portsmouth and I am looking for offers to take on this once fine craft as a project. Additional photos available.

If she is not moved on by early January I will reluctantly have to break her up.

Offers please to :- Derek Jarman via [derekjarman@ntlworld.com](mailto:derekjarman@ntlworld.com) or 07801 185700
