

Dauntless 23' PEBBLE CORK II for sale

Probably built about 1968, now a restoration project.

She has not been used for 3-4 years but was restored in 2002 and restoration details are in Dauntless Association Newsletter 12, March 2002. She now needs some cosmetic TLC. She is basically sound other than; she was damaged on a mooring, with a crack in the hull. She was lifted out of the water and has been on a trailer in a yard since, in North Wales. The boat is on the trailer in a farm yard at Pentir near Llanberis in North Wales.

This current Dauntless newsletter details replacement of planks and she can be easily with a little skill and of course the Dauntless Association would be delighted to advise.

Pebble Cork II during restoration in 2002.

She is fitted with a Volvo Penta twin 20hp engine, but not run for several years, these engines are virtually indestructible and can be extremely reliable. She has mast, rigging and sails plus fenders.

The owner has just not had time to get her repaired and would now like to sell her, really for the price of the good 6 wheel trailer she now sits on. This trailer is in roadworthy condition and braked. He would like her to go to someone who would cherish and restore her.

Price £1500 or offers, (including trailer).
